```
for(var n=0;n<=10;n++)
{
        if(n==5)
{
continue;
}
        document.write(n+"<br>");
}
```

In the above example, which writes out the value of n starting from 0, when n is equal to 5 the continue statement is executed and the **continue** statement continues the loop without printing the value 5 and the output is as follows,

Illustration 15.7 Using continue statement

```
<Html>
 <Head>
  <Title>Demo Program - To test Continue command in JavaScript </Title>
 </Head>
<Body>
 <script language="javascript" type="text/javascript">
  document.write("<h2> Using continue Statement </h2>");
  for( var no2=0;no2<=10;no2++)
  {
   if(no2==5)
   {continue;}
   document.write(no2+" ");
  }
  </script>
 </Body>
</Html>
```

15.2.3 while loop

In JavaScript **while** loop is another most basic loop. The purpose of a **while** loop is to execute a statement /block of statement repeatedly as long as an expression is true.

The while statement creates a loop that executes a specified statement as long as the test condition evaluates to true. The condition is evaluated before executing the statement.
