Hanging indent -This is a special kind of indent where the first line of the paragraph alone hangs outside leaving the rest of the text. To apply Hanging indent, a **negative** value is given in the **"First line"** option of the paragraph dialog box as shown in Figure 6.23.

6.8.4 Bullets and Numbering

Bullets and numbering are used to emphasize list of things and make the list easy to read and follow. It provides an excellent way to segregate, list and organize information to the reader. You can control the appearance, or format a bulleted or numbered list.

Bullets – This is a paragraph level attribute that applies a bullet character to the start of the paragraph. In bulleted lists, each paragraph begins with a bullet character. This is suitable when the text has to be presented as a list of items preceded by a bullet symbol and no sequence has to be followed. Bullets are quickly created by clicking on the **Bullet icon**

Numbering – This attribute applies a numeral to the start of the paragraph. Numbering is more suitable when the text has to be presented as a sequence. In numbered list, each paragraph begins with an expression that includes a number or letter and a separator such as a period or parenthesis. The numbers in a numbered list are updated automatically when you add or remove paragraphs in the list. Numbering is quickly created by clicking on the **Numbering icon.**

6.8.5 Style of Bullets and Numbering

The default type of bullet is (.) and the default type of numbering is (1, 2, 3 ……). The style of bullets and numbering can be changed by applying the following steps:

- Select the text to be bulleted
- ***Format → Bullets and Numbering***
- Select ***Bullets Tab***
- The ***Bullets and Numbering*** dialog box appears where different styles of bullets are displayed
- Click on the required style
- Click **Ok** button
- The selected text is bulleted.

The bullets and numbering dialog box with the bullets tab is displayed in Figure 6.24.
