Tsunami

Though Tsunami is not a common one in India, its incident in 2004 alerted India and the state of Tamil Nadu on this aspect.

Tsunami

Risk Reduction Measures

Before: if you live in a coastal area, know about tsunami risk and local warning arrangements; develop household emergency plan; know where the nearest high ground is and how you will reach it.

During: Take your get away kit, don't travel areas at risk; move immediately nearest high ground; if you can't escape tsunami, go to an upper storey of the building or climb onto a roof or tree or grab a floating objects; never go to the shore to watch tsunami and listen to local radio stations as emergency management.

After: Continue to listen to the radio; don't return to the evacuation zone until authorities have given all clear; check yourself for injuries and get first aid and help others.

6.12.7 Earthquakes

India is a vast country which experiences many earthquakes at different periods. Generally high risk zones of the country are located in the north and central parts. The state of Tamil Nadu is located in the moderately low risk zone.

Risk Reduction Measures

During: Take cover under a strong table or any other piece of furniture and remain under cover until the shaking stops.

After: Proceed cautiously once the earthquake has stopped and always avoid roads, bridges that might have been damaged by the earthquake.

For the management of disasters in the state, the following forces and organizations are in service.

State/Union Territories organizations	District Organizations
1. State Disaster Management Authority (Chairman-Chief Minister)	1. District Magistrate (Chairman-District Collector)

SUMMARY

- Physical geography is the branch of geography dealing with the different physical aspects such as landforms, drainage, climate, soil, natural vegetation etc.
- Tamil Nadu is broadly classified into three physical divisions namely mountains (Western and Eastern Ghats), plateaus (Bharamahal, Coimbatore and Madurai) and plains (inland and coastal).
