Note: The chart Diagram shows that Sector-wise contribution in GDP of India for the year 1950-2018

India is 2nd largest producer of agricultural products. India accounts for 7.39 percent of total global agricultural output.

In Industrial sector, India's world rank is 6 and in Service sector, India's world rank is 8. Contribution of Agriculture sector in Indian economy is much higher than world's average (6.4%). Contribution of Industry and Services sector is lower than world's average 30% for Industry sector and 63% for Services sector.

Gross value added (GVA) is the measure of the value of goods and services produced in an area, industry or sector of an economy.

GVA = GDP + subsidies - (direct, sales) taxes.

1.5 Economic Growth and Development

As per the economist Amartya Sen, economic growth is one aspect of economic development. Also, United Nation see it like this "Economic development focuses not only on man's materialistic need but it focuses on overall development or rise in its living standards.

Economic Growth

It is the quantitative measure which considers the rise in the output produced in an economy or nation in a particular period in its monetary value. The key parameters of economic growth in any economy are its Gross Domestic Product (GDP) and gross national product which helps in measuring the actual size of an economy.

Economic Development

Economic development projects a broader picture of an economy which takes into account
