1. Raising the productivity of inputs

One of the important objectives of India's agricultural policy is to improve the productivity of inputs so purchased like, HYV seeds, fertilisers, pesticides, irrigation projects etc.

2. Raising value-added per hectare

Agricultural policy is to increase per hectare value-added by raising the productivity of agriculture in general and productivity of small and marginal holding in particular.

3. Protecting the interests of poor farmers

Agricultural policy is proposed to protect the interests of poor and marginal farmers by abolishing intermediaries through land reforms, expanding institutional credit support to poor farmers etc.

4. Modernising agricultural sector

Here the policy support includes the introduction of modern technology in agricultural operations and application of improved agricultural inputs like HYV seeds, fertilizers etc.

5. Environmental degradation

Agricultural policy of India has set another objective to check environmental degradation of natural base of Indian agriculture.

6. Removing bureaucratic obstacles

The policy has set another objective to remove bureaucratic obstacles on the farmers' co-operative societies and self-help institutions so that they can work independently.

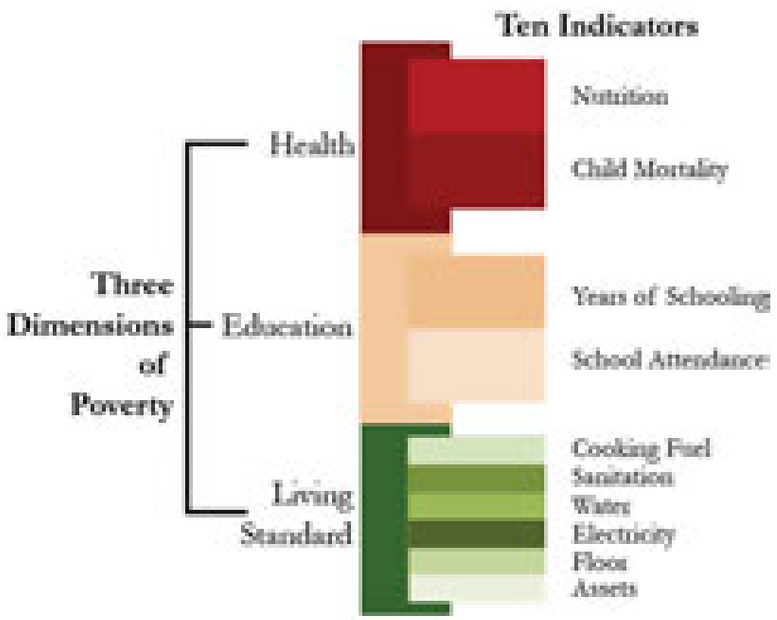

3.5 Multi-dimensional Nature of Poverty

The Multi-dimensional Poverty Index (MPI) was launched by the United Nations Development Programme (UNDP) and the Oxford Poverty Human Development Initiative (OPHI) in 2010. The basic philosophy and significance of MPI is that it is based on the idea that poverty is not unidimensional, and that it is rather multi-dimensional.

Multi-dimensional poverty is made up of several factors that constitute poor people's experience of deprivation such as health, education, living standards, income, disempowerment, quality of work and threat from violence.

Multi-dimensional Poverty Index 2018 Report in Tamil Nadu

Over the last decades, Tamil Nadu has made a significant progress in poverty reduction. The districts in Tamil Nadu are classified into three categories, namely high-poverty districts (more than 40% of the population living below poverty
