No. of calls	0	1	2	3	4	5	6	7
Frequency	14	21	25	43	51	40	39	12

Evaluate the mean, median and mode.

31. Calculate the geometric and the harmonic mean of the following series of monthly expenditure of a batch of students.

125, 130, 75, 10, 45, 0.5, 0.40, 500, 150, 5

32. Find out the mode of the following series:

Wages (₹)	Below 25	25 – 50	50 – 75	75 – 100	100 – 125	Above 125
No. of persons	10	30	40	25	20	15

33. Find the median, lower quartile, 7th decile and 85th percentile of the frequency distribution given below:

Marks in Statistics	Below 10	10 – 20	20 – 30	30 – 40	40 – 50	50 – 60	60 – 70	Above 70
No. of Students	8	12	20	32	30	28	12	4

34. The following data gives the distribution of heights of a group of 60 college students:

Height (in cms)	Number of students
145.0 – 149. 9	2
150.0 – 154.9	5
155.0 – 159.9	9
160.0 – 164.9	15
165.0 – 169.9	16
170.0 – 174.9	7
175.0 – 179.9	5
180.0 – 184.9	1

Draw the histogram for this distribution and find the modal height. Check this result by using the algebraic formula.
