ICT CORNER

ELEMENTARY PROBABILITY THEORY-BAYES THEOREM PROBLEM

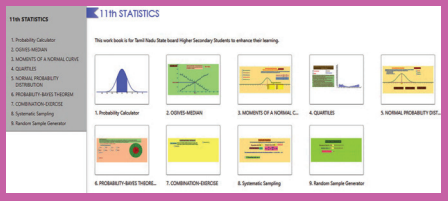

This activity is for conditional probability based Bayes theorem.
This helps to understand the problem.

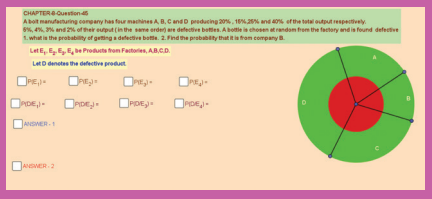

Steps:

- Open the browser and type the URL given (or) scan the QR code.
- GeoGebra work book called "**11th Standard Statistics**" will appear. In this several work sheets for Statistics are given, open the worksheet named "**Probability-Bayes theorem**"
- A text book exercise problem is explained step by step. Read the question carefully and compare with the diagram on right-hand side to assign the names as given and observe the check box names.
- Now click on the check boxes for separate probabilities and conditional probabilities. Now try to understand what conditional probability is, by observing the diagram.
- Now recall the formula for total probability **P(D)** and Bayes formula **$P(E_2/D)$** and work out.
- Now click on "**Answer-1**" and "**Answer-2**" and check your answer.
