Solution :

Since we are comparing the amount spent by two schools in a year towards various expenditures with respect to their total expenditures, a component bar diagram is drawn.

Step 1 : Schools are marked along the *X*-axis and labeled as "School".

Step 2 : Expenditure Head are marked along the *Y*-axis and labeled as "Expenditure (₹ in lakhs)".

Step 3 : Vertical rectangular bars are erected for each school, whose heights are proportional to their respective total expenditure.

Step 4 : Each vertical bar is split into components in the order of the list of expenditure heads. Area of each rectangular box is proportional to the frequency of the respective expenditure head/component. Rectangular boxes for each school are coloured with different colours. Same colours are applied to the similar expenditure heads for each school.

Step 5 : Legends are displayed to describe the colours applied to the rectangular boxes drawn for various expenditure heads.

The component bar diagram is presented in Fig 4.4.

Expenditure Head	Amount (₹ in lakhs)			
	School I		School II	
	Amount Spent	Cumulative Amount Spent	Amount Spent	Cumulative Amount Spent
Construction/Repairs	80	80	90	90
Computers	35	115	50	140
Laboratory	30	145	25	165
Watering plants	45	190	40	205
Library books	40	230	30	235
