***Solution:***

Since we are comparing the amount spent by two schools in a year towards various expenditures with respect to their total expenditures in percentages, a percentage bar diagram is drawn.

**Step 1 :** Schools are marked along the *X*-axis and labeled as "School".

**Step 2 :** Amount spent in percentages are marked along the Y-axis and labeled as "Percentage of Expenditure (₹ in lakhs)".

**Step 3 :** Vertical rectangular bars are erected for each school, whose heights are taken to be hundred.

**Step 4 :** Each vertical bar is split into components in the order of the list of percentage expenditure heads. Area of each rectangular box is proportional to the percentage of frequency of the respective expenditure head/component. Rectangular boxes for each school are coloured with different colours. Same colours are applied to the similar expenditure heads for each school.

**Step 5 :** Legends are displayed to describe the colours applied to the rectangular boxes drawn for various expenditure heads.

**The percentage bar diagram is presented in Fig 4.5.**
