Solution:

Since we are displaying the distribution of time taken (in minutes) by 100 students to travel to school on a particular day in visual form, the histogram is drawn.

Step 1 : Time taken are marked along the X-axis and labeled as "Time (in minutes)".

Step 2 : Number of students are marked along the Y-axis and labeled as "No. of students".

Step 3 : Corresponding to each time taken, a vertical attached bar is drawn whose height is proportional to the number of students.

The Histogram is presented in Fig 4.8.

(i) 5+25+40=70 students travel to school within 15 minutes

(ii) 13 students travelling time is more than 20 minutes

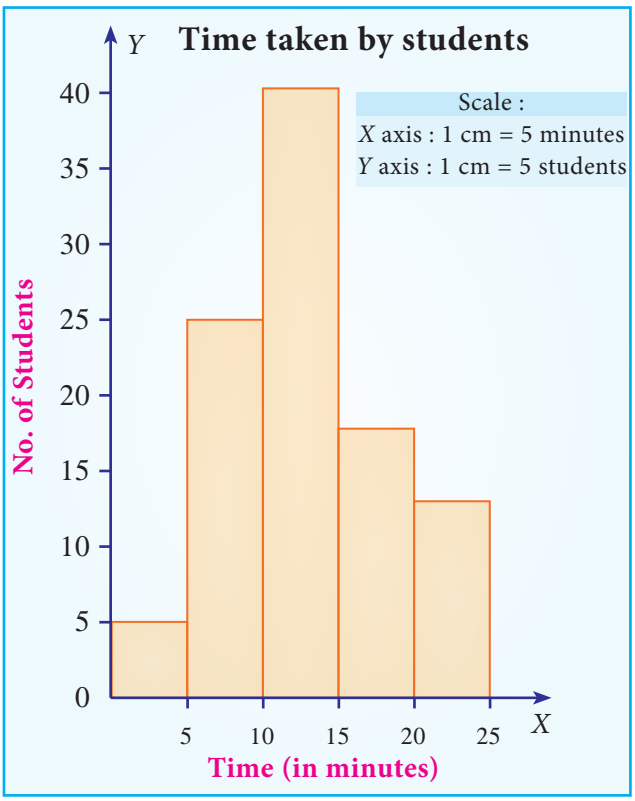

Fig 4.8 Histogram for time taken by students to travel to school

Example 4.11

Draw a histogram for the following 100 persons whose daily wages (in ₹) are given below.

Daily wages	0 – 50	50 – 100	100 – 200	200 – 250	250 – 450	450 – 500
Number of persons	5	10	16	7	48	14

Also find:

(i) Number of persons who gets daily wages less than ₹ 200?

(ii) Number of persons whose daily wages are more than ₹ 250?

Solution:

Since we are displaying the distribution of 100 persons whose daily wages in rupees in visual form, the histogram is drawn.

Step 1 : Daily wages are marked along the *X*-axis and labeled as "Daily Wages (in ₹)".
