Step 2 : Number of Persons are marked along the Y-axis and labeled as "No. of Persons".

Step 3 : Corresponding to each daily wages, a vertical attached bar is drawn whose height is proportional to the number of persons.

The Histogram is presented in Fig 4.9.

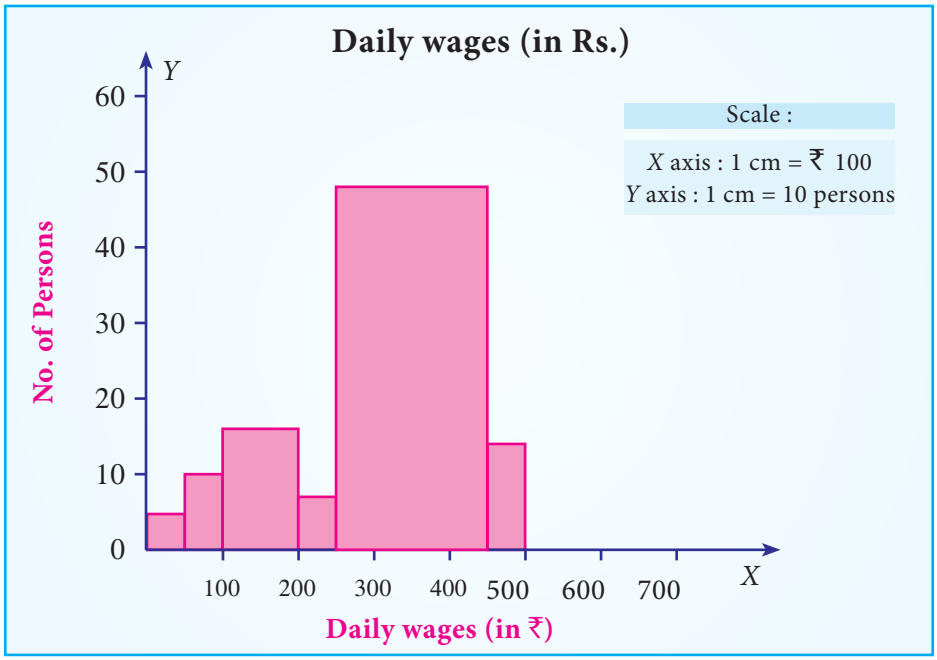

Fig 4.9 Histogram of daily wages (in ₹) for persons

(i) 5+10+16=31 persons get daily wages less than ₹ 200.

(ii) 48+14=62 persons get more than Rs 250.

4.4.2 Frequency Polygon

Frequency polygon is drawn after drawing histogram for a given frequency distribution. The area covered under the polygon is equal to the area of the histogram. Vertices of the polygon represent the class frequencies. Frequency polygon helps to determine the classes with higher frequencies. It displays the tendency of the data. The following procedure can be followed to draw frequency polygon:

(i) Mark the midpoints at the top of each vertical bar in the histogram representing the classes.

(ii) Connect the midpoints by line segments.

Example 4.12

A firm reported that its Net Worth in the years 2011-2016 are as follows:
