Year	2011 -2012	2012 – 2013	2013 – 2014	2014 – 2015	2015 - 2016
Net Worth (₹ in lakhs)	100	112	120	133	117

Draw the frequency polygon for the above data

Solution:

Since we are displaying the distribution of Net worth in the years 2011-2016, the Frequency polygon is drawn to determine the classes with higher frequencies. It displays the tendency of the data.

The following procedure can be followed to draw frequency polygon:

Step 1 : Year are marked along the *X*-axis and labeled as 'Year'.

Step 2 : Net worth are marked along the *Y*-axis and labeled as 'Net Worth (in lakhs of ₹)'.

Step 3 : Mark the midpoints at the top of each vertical bar in the histogram representing the year.

Step 4 : Connect the midpoints by line segments.

The Frequency polygon is presented in Fig 4.10.

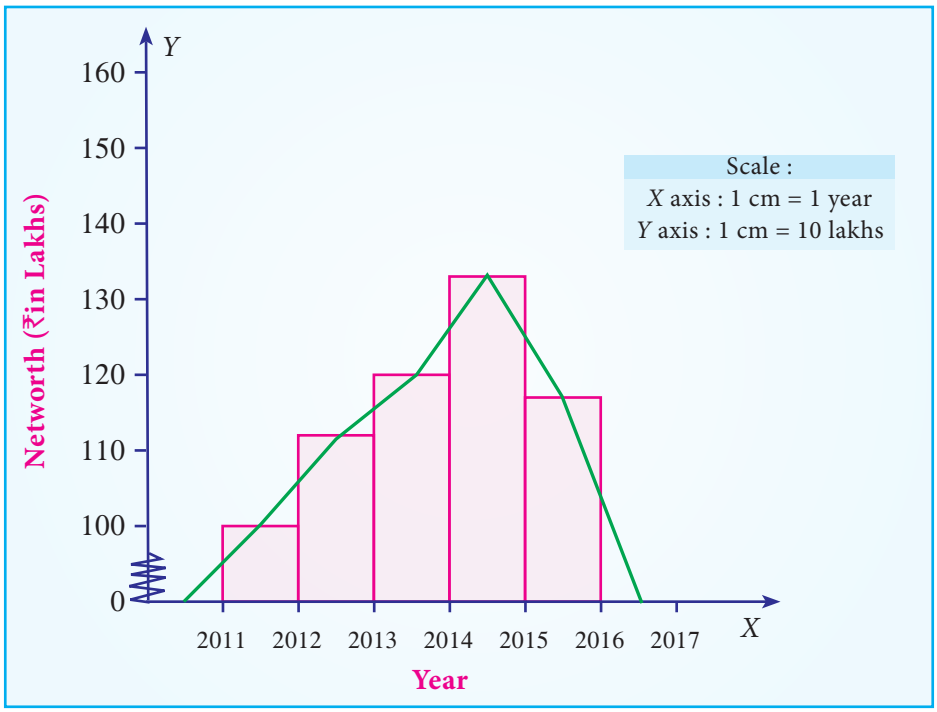

Fig 4.10 Frequency polygon for Net Worth in the years 2011-2016

4.4.3 Frequency Curve

Frequency curve is a smooth and free-hand curve drawn to represent a frequency distribution. Frequency curve is drawn by smoothing the vertices of the frequency
