Unit 2

ELECTRICITY

Learning Objectives

- Understanding the flow of electric current and learning to draw the circuit diagram
- Understanding the difference between conventional current and electron flow.
- Understanding the different types of circuit based on flow of electricity and the connection of bulbs in a circuit
- Distinguishing a cell and a battery
- Understanding the effects of electric current and factors affecting the effect of electric current
- Applying their knowledge in identifying the components of electrical circuits.
- Understanding the discrimination between different type of circuits.
- Doing numerical problems and drawing the circuit diagram of their own.
