2. The cost of performing routine office work is reduced.
3. Responsibility can be easily fixed.
4. Good office system and procedure helps in smooth running of office and help to reduce delay in work.
5. It helps for speedy despatch of work.
6. Systems & Procedure include internal checking; they assist in the prevention of fraud and have control on work.
7. Good system helps to maintain better co-ordination between departments.
8. Helps the management to train the staff.
9. A good system will reduce the chance of error and improve the efficiency of the organization.
10. A good system will give instructions to employees what has to be done, when and where and gives information on the organization supporting various systems.

7.1.7. Benefits and Limitations of Systems and Procedures:

Benefits of Systems and Procedures:

Following are the benefits which may be obtained if suitable systems and procedure are derived in an office:

1. Errors in the smooth flow of office work can be easily eliminated.
2. Uniformity can be achieved and the duplication of various routines can be avoided.
3. Systems and routines help in training office personnel in the efficient performance of their work without supervisors.
4. Responsibility can be fixed for each employee.
5. Unnecessary operations are eliminated and so wastage of any nature can be controlled.
6. Office personnel can perform their jobs independently and with confidence.
7. Systems ensure better control of work. The possibility of fraud is eliminated.
8. Work efficiency in the office increases and unnecessary forms are eliminated. It reduces the cost of office operations.
9. Better co-ordination is possible through the introduction of a system.

Limitations of Systems and Procedures:

An office system does not work by itself. There are some limitations to its applications:

1. The efficiency of the system depends on planning. If the planning is not done properly the whole systems would fail.
2. Strict adherence to a system makes it inflexible and it may not work smoothly.
3. The system may not be useful when changes take place.
4. The efficiency of the system should be evaluated and decided by making a cost-benefit analysis of it. If the cost is more we cannot use that system.
