Operation (doing the work like typing posting entry and etc.)

Delay (delay due to interruptions, bottlenecks, changeover, etc)

Storage (Holding the work for any reason)

3. Management Type Flow Chart:

Management type flow chart is fully illustrated chart and each operation or steps involved are described in short and descriptive sentence. The chart is written and read horizontally from left to right.

7.2.1. Straight-Line Flow of Work:

Smooth flow of work can be ensured by the use of straight-line flow of work method. This method is applicable for the factory as well as the office. It can be described as the method, in which the work flows, while progressing from one operation to another, it should follow a course approximating as nearly as may be possible in a straight line. In order to avoid the wastage of time, effort and delay in the flow of information, the work must always move forward and in a straight-line.

7.2.2. Benefits of Straight-Line Flow of Work:

The following are the list of benefits of straight-line flow of work:

1. Greater Speed: The speed of work increases greatly, since the movement of work is over the least area.

2. Lesser Messenger Work: Since the work is flowing in a straight-line, the desks can be arranged in a straight-line, the distance between the different operations is small. The papers or files are passed over from one desk to another by the clerks is easy. It reduces the messenger work.

3. Less Loss of Papers: In this method, papers are rarely mislaid or lost as they are handled in a systematic manner.

4. Use of Conveyors: In certain organization conveyors are used to transfer the files from one place to another, such an arrangement helps to speed up the work.

5. Keeps Executives and Clerks at Their Desks: As the work moves in a straight-line, this method avoids moving here and there unnecessarily and makes the employees to sit in their chair to do the work.

7.2.3 Problems in Smooth Flow of Work:

Smooth flow of work faces number of problems, which must be tackled in order to improve the efficiency of office routine. It can be solved only by the managers. The problems are outlined below:

1. Unequal Flow of Work: The work in the office cannot be equal throughout the day, the week or the year. The work may be heavy on particular day in a week or it may be heavy during a particular period. For example, there may be greater incoming mails in the morning and on Mondays. The problem of unusual flow of work can be solved by collecting relevant statistics and their analysis.
