3. Dictation Machines:

Dictation Machines are generally used by the executives who need to draft letters, memos, and reports are best off dictating the copy and recording it, as speaking is much faster than writing and can be done while performing other tasks. This type of equipment chosen depends on the preference of the dictators, number of users, frequency of use, and budget. Some dictation equipment use cassette tapes and most of the modern versions are digitally recorded and also this phone system is used for recording. Once the audio is recorded, this file is processed to another employee, who transcribes the audio into a written document, saves and emails or prints it.

II. Accounting, Tabulating and Computing Machine:

1. **Adding Machine:** Adding machines may either be manually or electrically operated. Most adding machines have a roll of paper on which the figures are typed and this is known as a "Tally Roll". It is used for addition and also for multiplication, subtraction and division.

2. **Calculating Machines:** It calculates at a greater speed and runs without making any noise, but such machines are usually expensive. The essence of a calculating machine is that it can perform addition, subtraction, multiplication, and division operations.

3. **Billing Machine:** Billing machines are used to prepare invoices, bills of lading, cash memo, etc. The machine makes all calculations of discounts, commission, addition, subtraction, total, etc. Papers and carbons are fed into the machine and set automatically.
