manually or electrically. It automatically prints in a franking design comprising the postal charge and the date of posting in bright red ink. It has a meter which records the amount and balance on hand.

Fig. 2.7. Franking Machine

2. Impression Stamps:

These include rubber stamps bearing certain impressions like "paid", "delivered", "checked", etc. Stamps bearing date with time and numbering devices also fall under this category.

3. Time Recording Machines:

This popular machine is used for recording the accurate time of arrival and departure of the office employees in offices and factories.

4. Payroll Machines:

It is used for making the payroll of the employees, calculating the amount to be paid to each employee.

5. Slide Rule:

It is a type of scale which is used to make different measurements rapidly and accurately.

6. Punching Machine:

This is a small apparatus which punches holes on papers. The holes are required to tag and fasten the papers. It is operated manually.

7. Stapler:

It is a small machine which binds together a few papers with a small piece of thin wire. It is very commonly used in small offices.

8. Calculators:

A variety of calculators are available in the market. It is useful for multiplication, division, addition and subtraction, calculation of discount, internet, wages, etc. It helps to reduce human labour in arithmetical calculations.

9. Envelope Sealing Machine:

This is a machine which automatically seals the envelopes. It will dampen the gummed flaps of the envelopes; thus sealing of the envelopes becomes very easy.

IV. Modern Machines:

1. Swipe Machine:

A swipe machine is a payment terminal provided by the bank on which the merchant can swipe a dip card to receive payments. Since the card can be a debit or a credit card the machine is also known as a credit card swipe machine or a debit card swipe machine.
