typing marginal notes paragraph numbers and etc.

4. BACK SPACER : when we operate the back spacer ,the carriage moves

towards right by one degree by leaving blank space . this is used to fill up omissions

and to make correction. To type combination letters etc.

5. TABULATOR: It consist of

(1) Tabulator Bar

(2) Tabulator Set Key

(3) Tabulator Clear Key

There are as many number of tabulator stops in the tabulator rack as there are degrees in the carriage scale.

The tabulator bar is used to bring the carriage to any particular position quickly towards left.

The tabulator bar is used to type tabular column statements, specifications and indent paragraphs. (giving five spaces for paragraphs)

### *6. Ribbon position indicator:*

Otherwise called ribbon colour indicator or ribbon switch or bi-chrome device lever, is fixed at the right side of the key board.

The up and down movement of the ribbon is controlled by the ribbon position indicator.

### *7. Key Releaser*

It is used for releasing the type bars when 'jam' occurs due to mishandling.

### *8. Space Bar:*

It is located at the bottom of the key board and operated by the right thumb. If we use the space bar the carriage moves 1 degree towards right without making impressions (1 degree blank space). Also it is used for leaving blank space between words.

### *Shift Systems:*

There are two kinds of questions shift system:

(i) Segmest shift system

(ii) Carriage shift system

1. How many Non-character keys in their Typewriter?
2. How many character keys in the standard key board?
3. What is meant by a Dead key?
4. What are the Guider keys and Home keys?
5. What are the Guide fingers?
6. What is the use of shift keys and shift Lock?
7. What is the use of Space Bar?
