Main Sprind Drum:

It is located at the left back side of the Typewriter. In this drum there is main spring with tension. This mainspring tension is other wise called Carriage Tension which is the most important of the Typewriter. The carriage moves from right to left due to this mainspring tension which is situated on the left side. In Urdu (language) Typewriters the mainspring is fixed in right side and so the carriage moves from left to right when we type. There is no mainspring in Electric Typewriters.
