8. Currency Note Sorting and Counting Machine:

A currency note sorting machine is a compact and portable desktop solution for multi-currency counting and sorting challenges. It can denominate and authenticate different currencies at a processing speed of 1000 notes per minute. A currency note counting machine is a machine that counts money either stacks of bank notes or loose collections of coins. Currency counters are commonly used in vending machines to determine the amount of money which has been deposited by customers.

9. CCTV:

It is called closed circuit TV. A self-contained surveillance system comprises of cameras, recorders and displays for monitoring activities in a store or company.

10. Fax Machine:

A fax machine is the telephonic transmission of scanned printed material (text or images), usually to a telephone number associated with a printer or other output device. The original document is scanned with a fax machine, which treats the contents (text or images) as a single fixed graphic image, converting it into a bitmap. In this digital form, the information is transmitted as electrical signals through the telephone system. The receiving fax machine reconverts the coded image and prints a paper copy of the document.

11. Photostat Machine:

It is popularly known as "Xerox" machine taking its name from the company manufacturing this machine. Photocopying machines help in getting exact copies of the original at a greater speed. The term xerography means dry pictures. Copies of diagrams, illustrations, drawings etc. can also be obtained. It eliminates the need for checking.
