be available. The building should be free from dust, noise, fumes and intolerable smells.

3) **Adaptability to Proposed Layout:** It should be capable of being modified or altered so that different sections of the office may be properly accommodated in it.

4) **Office Fitting:** It should be adequately provided with electricity, power, telephone, water connection and other fittings.

5) **Future Expansion:** It should offer enough scope for future expansion. When a building is owned or constructed by the organization, provision should be made for additional floor for future expansion requirements.

6) **Type of Building:** The most suitable type of office building is that which provides completely open space other than the supporting columns and temporary partitions which can be removed if required.

The office building must ensure that there is

- Sufficient floor space for each worker and furniture required by him.
- Facilities for fresh air, water, lighting and ventilation.
- Service facilities like telephone and lights in the building.
- Scope for renewal and alterations in the building if required in future
- Facilities of general convenience, toilet, canteen etc.

3.3. Office Layout:

3.3.1. Definition of Office Layout:

According to **Littlefield**, "Office layout may be defined as the arrangement of equipment within the available floor space".

According to **Hicks** and **Blakes**, "The problem of layout relates to the arrangement in the space involved so that all the equipment, supplies, procedures and personnel can function at maximum efficiency".

The object of an office layout is to make arrangements for placing of men, materials, machines, furniture and equipment within the available floor space of the office in such a way that everything can be utilized in the best possible manner. An office layout involves:

(i) The determination of the correct amount of space for each employee and for machinery and equipment they use

(ii) The correct arrangement of furniture, equipment and machinery and

(iii) The best possible environmental conditions.
