Commercial Paper Pattern

Commercial paper pattern are the readymade patterns, available in shops for all body measurements. These come with instruction manuals and step by step guidelines about selection of fabric, preparation of fabric, marking, cutting and steps for sewing. Butter paper or tracing papers are used for the preparation of commercial paper patterns. Garment variation is also seen in some commercial patterns. The patterns are placed in envelopes with pictures of the garments on models and fabric combination in which the garment will look good (Figure 10.5).
