beading and machine embroidery can be combined to create variety (Figure 14.5).

14.3.1.6 Quilting

Quilting is technique of giving a textured look to the garment. It adds weight and warmth. Generally geometrically designs like circles, diamond shapes and square are done in quilting. Quilting is done on running fabric before cutting the patterns.

Foam is placed in between the garment fabric and the lining fabric. Lines are stitched to create the required effect. Later patterns are placed on this fabric and cut and used for the garment making. Quilting can be done for specific areas like yokes. Contrast colour threads or embroidery threads can be used in the bobbin to create interest in quilting work (Figure 14.6).

14.3.1.7 Belts

Belt is an important fashion accessory. It can be used as a design feature or it can act as a main focal point in a design. It can give the whole design a delicate effect.

The different types of fasteners used with belts are hooks, buckles, claps, ties, studs. We can create variety by using different materials, fasteners, leather or a combination of above material (Figure 14.7).

14.3.1.8 Bows

Bows are used as fasteners or it can also be used as decorative feature in a garment. Bows made from taffeta, cotton, linen produce a sharp and crisp look. Soft bows can be made from soft fabric that drapes well. A bow can be stitched at neckline, waist line or it can be tied at the back to give an interesting effect. When bows are cut in bias, they drape well (Figure 14.8).
