GLOSSARY

1.	**Cellulose Fiber**	Cellulose fibre comes from plants that are processed into a pulp.
2.	**Spinneret**	A cap or plate with a number of small holes through which a fibre forming solution is forced.
3.	**Glutinous**	Like glue in texture.
4.	**Calendaring**	A calendar is employed, usually to smooth, coat or thin a material.
5.	**Emboss**	Stamp a design on (a surface or object) so it stands out in relief.
6.	**Flame Retardants**	A key component in reducing the devastating impact of fires on people or property.
7.	**Preshrinking**	To shrink (a fabric) before making into a garment so that it will not shrink much when washed.
8.	**Stiffening**	Material used to stiffen a garment, fabric or other object.
9.	**Wrinkle**	Make or cause lines or folds in (something and especially fabric or the skin).
10.	**Catalyst**	A substance that increase the rate of a chemical reaction without itself undergoing any permanent chemical change.
