Who Invented the First Functional Sewing Machine?

The First Functional Sewing Machine was invented by French tailor Barthelemy Thimonnier in 1830. This instrument had hook like structure which produced chain stitches.

First Sewing Machine

8.2 PARTS OF SEWING MACHINE

Parts and functions of a sewing machine are listed below (Figure 8.1).

Spool Pin

Spool pin is a small metal rod on the body of the sewing machine. The main function of spool pin is to hold the spool of thread (Figure 8.2).

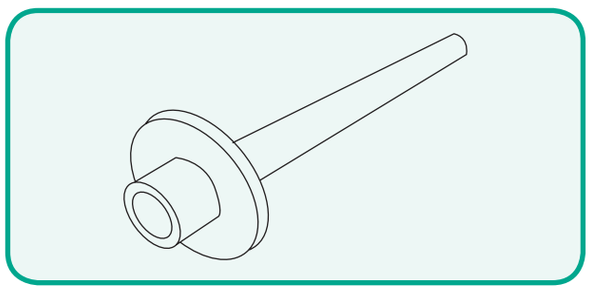

Figure 8.2 Spool Pin

Thread Guide

Thread guide is a small metal ring, on the face of sewing machine. It keeps the thread in position and guides the thread from the spool to the needle.

Tension Disc

Tension disc is a metal spring with concave disc and screw. The thread is fed
