1.3.1 Foods and Nutrition

In this course, the chemical composition of food, the nutrients present in them, their bioavailability, functions of various nutrients, and loss of nutrients in cooking and processing, techniques in food safety and food security, nutritional deficiencies in the human body and its consequences are dealt with in detail.

1.3.2 Family Resource Management

The management of resources such as time, money, energy and space are the main topics for study under family and community resource management. The students gain knowledge about home scale budget preparation and work simplification techniques. Consumer education is also included under this subject in order to ensure that students become intelligent consumers who are aware of their duties, responsibilities, rights and privileges as consumers in the society. The students are provided information regarding food safety, safety against adulteration, common adulterants, health hazards and Consumer Protection Act. Major principles and basics of design and arts are also detailed in this area.

Various factors of FRM

1.3.3 Textile and Clothing

Textile science includes all details about various natural and synthetic fibres. The process involved in construction of fabric, apparel designing as well as fabric finishes are taught.
