- Home based diets are best for children's growth.
- Adolescents need to be encouraged to do physical activity particularly outdoor games. Physical activity regulates appetite.

DO YOU KNOW?

Dysphagia means difficulty in swallowing

Nutrition Related Problems

- Acne Vulgaris
- Anaemia
- Obesity
- Eating Disorders
  i. Anorexia Nervosa
  ii. Bulimia Nervosa
  iii. Binge Eating Disorder
- Predisposition to Osteoporosis

DO YOU KNOW?

Competitive foods are less nutritious, such as high- fat, high-sugar snacks, soda and other sweetened beverages and these foods competes with healthier food choices for consumption.

Difference between Appetite and Hunger

- Appetite is defined as any of the instinctive desires necessary to keep up organic life, especially the desire to eat.
- Hunger is defined as a craving or urgent need for food or a specific nutrient due to lack of food.

How to promote increased fruit and vegetable intake:

- Add fruit purees and mixes into yogurt, milkshakes and pudding
- Grate vegetables and add to batter and dough while making idlies, dosas and chapattis
- Mix vegetable purees into soups and noodles.

Activity 5

Reflect on your food choices as teenager. Do you think your meal choices were balanced and varied? What could you have done to improve your nutritional habits at that time?

6.6 NUTRITIONAL NEEDS OF ADULTS

When an individual reaches adulthood, body growth especially in terms of height and body status stop to a certain extent, but tissue breakdown and repair of body tissues continue even among adults. Therefore adequate amount of essential nutrients need to be provided for maintenance of physical and mental health in adults.

Energy-Kilocalories

There is a gradual loss of functioning body cells and reduced physical activity so adults generally require less energy intake as they grow older. The basic fuels required to supply these energy needs are primarily carbohydrates with moderate fat.
