7.1 INTRODUCTION

The first contact for every individual in this world is her/his family. The family is a socially recognized unit of people united together by marriage, kinship or legal ties. Management in the context on the family is the natural outgrowth of human associations and interactions. Its ultimate aim is to provide for optimal development of its individual members. Management of family allows us to overcome our individual limitations. Through the combination of individual efforts and resources, we achieve far more than what we could do independently. Most families are not aware of all the resources at their disposal. The quality and quantity of resources that are available to each family varies.
