**Single-use plan** is one that is developed for a specific function, event or activity with the anticipation it will not be used again. While ***repeat use plan*** is one that is developed in the anticipation, it will be modified and frequently used in similar situations, for similar demands or events or to resolve like problems. ***Sequencing*** is a phase of the planning component of management process in which all tasks necessary to achieve the goal are placed in a logical order; the standards for each task are established.

**Activity 1**

- Identify and record the repeat use plans you use frequently and list the sequence of activities that take place.
- List any two single-use plans you have developed and identify the function, situation or event for which the plan was developed.

## 2. Organizing

Organising involves the performance of the following tasks.

a. Division of work among employees (assignment of duties)
b. Delegation of authority (transfer of official rights by a superior to his subordinate)
c. Creation of accountability (the subordinate, to whom work has been assigned and authority has been delegated, is made answerable for the progress of work).

## 3. Directing

Directing the human resource does not mean the process of issuing mere orders and instruction to the subordinate staff. It is, in fact, the process of supervising, guiding and motivating the employees in order to get the best out of them. By performing the directing function, the human resource manager will also be able to get the whole –hearted support and co-operation of all his subordinate staff. This help in the effective attainment of the enterprise objective.

## 4. Controlling

Controlling is carrying out the plan. This step calls for flexibility in thinking. At times new decisions are required which may result in changes in plan. For example: when the menus are planned for meals, if certain things are not available during shopping a fresh decision need to be made. The different phases of controlling are

- **Energising:** This is initiating and sustaining the action. The individuals who are involved in doing a particular task must be energized in order to get results. In spite of having a good plan, sometimes implementing the plan would become difficult. Here, the energizing function would act as a catalyst.
- **Checking:** This is a quick step by step evaluation of the progress of a plan. To go to school on time one has to get the clothes, the meals and books ready, which need checking of time at all stages.
- **Adjusting:** Adjusting is done in the plan if there is a need for fresh decisions to be taken. This should be done taking into account the problem in hand and the resources available. Getting into action,
