up objects, using cups, knives and forks, pouring drinks, dressing, holding and using pencils, pens, scissors and keyboards.

Social Development: Social development refers to the process by which a child learns to interact with others around them.

Emotional Development: It refers to the ability to recognize, express, and manage feelings at different stages of life how and why they happen and to have empathy for the feelings of others.

Cognitive Development: Cognitive development involves changes and stability in mental processes.

Language Development: Language development is the use of arbitrary symbols in an orderly fashion to communicate verbally and individual's wants and needs.

Activity 1

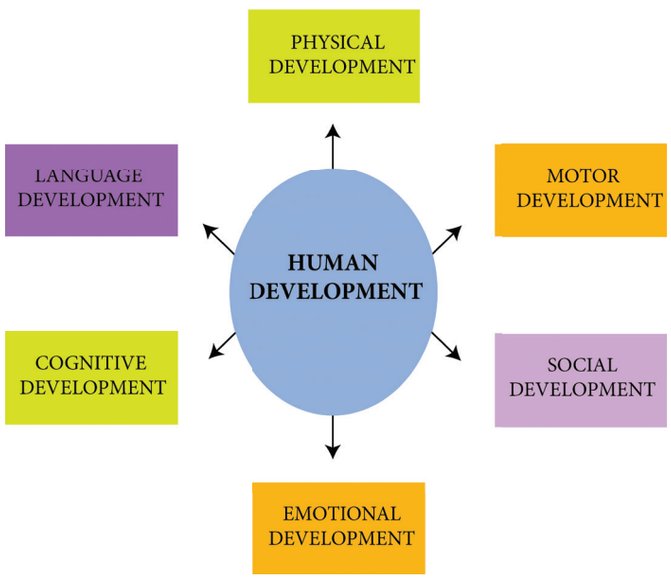

Observe your friends and write down their physical activities. Observe differences among them.

2.2.1 Infancy

Infancy is very critical and shortest of all developmental periods. Infancy is the second most rapid period of development and growth. Infancy begins with birth and ends when the infant in approximately two weeks old. This period is divided into two periods namely

i. Period of the Partunate – from birth to fifteen to thirty minutes after birth. The infant continues to be a parasite until the umbilical cord has been cut and tied.
