- They should be cheap
- They should be improvised as for as possible
- They should be large enough to be properly seen by the students for whom they are meant
- They should be up-to-date
- They should be easily portable
- They should be according to the mental level of the students.
- They should motivate they learners

Uses of Teaching Aids:

- To help children improve reading and comprehension skills
- Illustrate or reinforce a skill, fact, or idea
- Relieve anxiety, fears or boredom, since many teaching aids are like games.
- To stimulate interest, display can call attention to products or practices.
- To encourage student's participation – displays may be studied and discussed by students as a part of class activity
- To help children to communicate ideas visually

Importance of Teaching aids

- Motivation
- Clarification
- Increase the vocabulary
- Save time
- Avoid dullness
- Direct experience

8.6.2 Classification of Teaching aids

On the basis of characteristic of the material used in the process of teaching aid classifications as mentioned below:

Audio-aids: Audio-aids help in developing the listening skill of a learner. Audio-aids are those aids which can be only listened. Examples, of such types of aids include, radio, gramophone, tape recorder, audio-tapes, walkman and headphones etc.,

Visual-aids: Aids which require the involvement of learners visual senses are called visual aids. Examples, of such types of aids include viz. graphic aids, 3d-aids, display boards and print material etc.,

Audio-Visual aids: In these aids both the listening (ears) and viewing faculties (eyes) are involved. Such aids include television programmes, video films, motion pictures, synchronized audio slide projectors, computers and computer-assisted instructions etc.,

Projected: Projected refer to those aids where a bright light is passed through a transparent picture by means of a lens and an enlarged picture is thrown or projected on the screen or the white wall. Eg: film-strip projector, slide projector, overhead projector, TV/VCR etc.,

Non-Projected: Non-Projected aids refer to those aids which do not require projector electricity or projection screen. Such materials can be simply shown, can be hanged or touched. Eg: Chalkboard, Whiteboard, Flannel board, Magnet board, Charts and Wall-Charts, Posters and Pictorial Materials, Models etc.,

Dr.Edgar Dale has classified and arranged audio-visual aids in a proctorial form called "Cone of Experience"
