8.7 RECENT TRENDS IN COMMUNICATION – WEBSITE, EMAIL, MULTIMEDIA, E-LEARNING

Website: is a collection of related web pages, including multimedia content, typically identified with a common domain name, and published on at least one web server. A website may be accessible via a public Internet Protocol (IP) network, such as the internet, or a private Local Area Network (LAN), by referencing a Uniform Resource Locator (URL) that identifies the site.

Uses of websites

There are millions of websites on the internet. They are used for almost every conceivable purpose including business, personal and entertainment purposes. Some of the more common purposes of websites are described in the following section.
