What is E-Learning Technology?

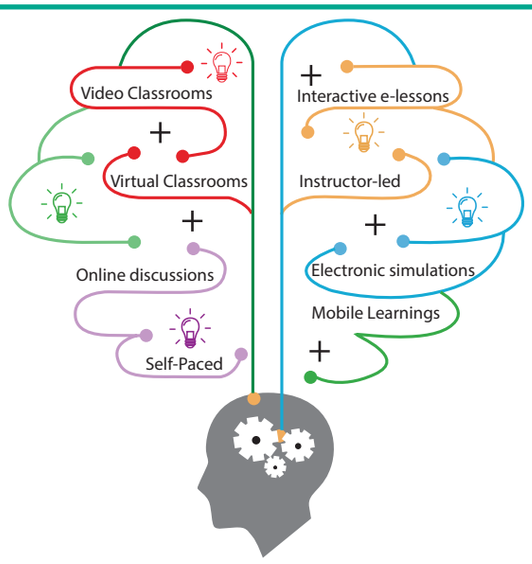

- Encompasses a broad range of application of technology
- Refers to using information and communications technology to:
  - Support the process of learning
  - Support communication in education
  - Evaluate learning activities
  - Manage resources
  - Create educational materials

Content is delivered using various media such as text, images, animations, streaming videos, and audio

Types of e-Learning

- Purely online –no face to-face meetings
- Blended learning – combination of online and face –to-face
- Synchronous
- Asynchronous
- Instructor-led group
- Self-study
- Self-study with subject matter expert
- Web-based
- Computer-based (CD-ROM)
- Video/audio tape

Choosing the right eLearning Methods: Factors and Elements

Benefits of E-Learning

- Focuses on needs of learner, not ability of trainer
- Flexibility of learning
- Effective use of time for both employee & trainer
- Economies of scale for all parties
- Technology can expand reach and range of traditional learning faculties

Advantage and Disadvantage of E-Learning

Advantages

- Just-in-time learing
- Standardised learing
- Self-paced learing
- Flexible means of asssessment
- No travel costs
- No classroom accommodation
- Cost-effective

Disadvantages

- Requires computer access
- Requires internet access
- Requires basic computer skills
- Does not suit all learners
- Development cost of good-quality bespoke material can be high
- Not all material may be compatible with underlying learning management system
