### 9.8.5.1 Causes of Anger

**Anger can be triggered due to many factors as given below:**

- Rejection by parents
- Rejection by peers
- Lower levels of academic achievements
- More mental health intervention

### 9.8.5.2 What happens in your body -

**when you get angry?**

(i). Your heart pounds
(ii). Your breathing changes
(iii). Your muscles get tense
(iv). Your face gets red
(v). There's a knot in your stomach
(vi). There's a lump in your throat
(vii). Release of the hormone Adrenaline

**Anger is a difficult feeling. When you're angry, you might do bad things that you wouldn't do if you were happy. But did you know that it's normal to feel angry from time to time? It happens to everyone**

**Good way to release anger**

- Get some exercise
- Practice controlled breathing
- Find or do something funny
- Listening to music
- Repeat self calming statements

**ANGER MANAGEMENT**

- Think before you speak . In the heat of the moment it is easy to say something but later we will regret
- Spend time out
- Identify possible solution

**Activity 9**

**Draw a picture of what you look like when you're angry**

What's something you say only when you're angry?
