Experiment No: 2

Date:

Aim: To develop aids to enhance cognitive development among preschool children by preparing a low cost aid to identify the size and colour.

Materials required:

Buttons or charts cut as buttons of different sizes (12) and buttons of different colour-12

Procedure:

1. Take buttons of four different sizes or draw buttons of four different sizes on a chart paper and cut them along the outline.
2. Visit a Balwadi or ICDS centre and select 2-10 preschool children for this observation
3. Now display the buttons to the children.
4. Ask the children to sort the buttons into four groups of increasing size.
5. Take buttons of four different colours.
6. Ask the children to sort the buttons into four groups of different colour.

Result:

S.No	Name of the preschooler	Observation (time taken Minutes)	Inference
