(ii) Banana Jam

Aim: To use sugar as a preservative in preserving food. E.g. jam

Materials required:

Knife, bowl, lemon squeezer, sauce pan, measuring cup, wooden ladle, sterile jar.

Note:

Bananas are easily available all times of the year and are affordable, hence it has been selected as the main ingredient.

Ingredients:

Bananas – 4

Lemons – 2

Sugar – 2 cups

Water – ½ cup

Method:

1. Remove the skin and slice the bananas.
2. Extract the juice from the lemon.
3. Add the bananas in the lime juice and mix it well.
4. Heat a large saucepan and add two cups of sugar and ½ cup of water. Cook for 10 mins.
5. Add the banana mixture to the syrup.
6. Allow it to boil for half an hour.
7. Allow the jam to cool and store it in a sterile container.
