

▲ Fig. 1 Classification of Carbohydrates

- **Functions:** The functions of carbohydrates include
  - Carbohydrates are a source of energy. Each gram of carbohydrate yields 4 kilo calories
  - Adequate supply of carbohydrate ensures that proteins are spared from performing the role of giving energy.
  - Major source of energy for muscular work.
  - Detoxifying action and regulating influence of protein and fat metabolism.
  - Source of energy for heart muscle
  - Excess calories through carbohydrate is stored as fat in the adipose tissue.
  - Stimulates the peristaltic movement in the form of dietary fiber which helps in preventing heart diseases, diabetes mellitus and cancer.
- **Food Sources:** Carbohydrates are found in cereals like Rice, Wheat, Bajra, Jowar. Fruits, Honey and Jaggery are also rich sources of carbohydrates

Food sources of carbohydrates

▲ Rice

▲ Wheat
