ICT CORNER

Projectile motion

HIT THE TARGET

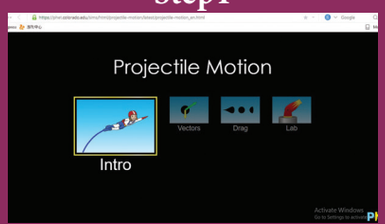

Through this activity you will be able to understand the velocity variation and Different angles of projection and range

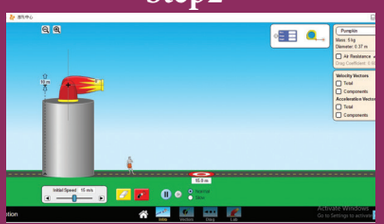

STEPS:

- Type the given URL (or) Scan the QR Code. You can see "Projectile Motion" PhET simulation page. Click 'Intro' to initiate the activity.
- Click the red coloured shoot button. Blast a ball out of a cannon, and challenge yourself to hit the target.
- Drag 'up & down' button to change the height of the cylinder. Click left and right button to change the speed of the cannon ball.
- Drag the target box and fix the target to measure time, range and height. Drag the Meter tape to measure the length from cannon. On the right side top, mark in the corresponding boxes to know the velocity vectors and acceleration vectors.
