Now, we will calculate the total price of the required and quantity of fruits from both the departmental store and market.

Calculating the total price from the Departmental store:

Fruit Name	Cost of the required fruits	Total Price (₹)
Apple 	Cost of 1 kg of apples = ₹120 Cost of 20 kg of apples = 20 × 120 = ₹2400	2400
Guava 	Cost of 1 kg guavas = ₹50 Cost of 20 kg guavas = 20 × 50 = ₹1000	1000
Strawberry 	Cost of 1 box of strawberries = ₹80 Cost of 30 boxes of strawberries = 30 × 80= ₹2400	2400
Banana 	Cost of 1dozen of bananas = ₹60 Cost of 20 kg of bananas = 20 × 60 = ₹1200	1200

Calculating the total price from the Market Price:

Fruit Name	Cost of the required fruits	Total Price (₹)
Apple 	Cost of 1 kg of apples = ₹110 Cost of 20 kg of apples = 20 × 110 = ₹2200	2200
Guava 	Cost of 1 kg of guavas = ₹40 Cost of 20 kg of guavas = 20 × 40 = ₹800	800
Strawberry 	Cost of 1 box of strawberries = ₹85 Cost of 30 boxes of strawberries = 30 × 85 = ₹2550	2550
Banana 	Cost of 1 kg of bananas = ₹50 Cost of 20 kg of bananas = 20 × 50 = ₹1000	1000

Now, let us compare the shopping price of the Departmental store to that of the Market shop.

Fruits	Cost of items as per your requirement (₹)	
	Departmental Store	Market
20 kg of Apples	2400	2200
20 kg of Guavas	1000	800
30 boxes of Strawberries	2400	2550
20 dozens of Bananas	1200	1000
Total cost of shopping	**7000**	**6550**
