GLOSSARY

Metre [m]	Distance light travels, in a vacuum, in 1/299792458th of a second.
Kilogram [kg]	Mass of an international prototype in the form of a platinum-iridium cylinder kept at Sevres in France.
Second [s]	Length of time taken for 9192631770 periods of vibration of the Caesium-133 atom to occur.
Ampere [A]	It is that current which produces a specified force between two parallel wires which are 1 metre apart in a vacuum.
Kelvin [K]	It is 1/273.16th of the thermodynamic temperature of the triple point of water.
Mole [mol]	Amount of the substance that contains as many elementary units as there are atoms in 0.012 kg of carbon-12.
Candela [cd]	Intensity of a source of light of a specified frequency, which gives a specified amount of power in a given direction.

TEXTBOOK EXERCISES

I. Choose the correct answer.

1. Choose the correct one.
   a. mm< cm < m < km
   b. mm > cm > m > km
   c. km < m < cm < mm
   d. mm > m> cm> km

EJUH44

2. Rulers, measuring tapes and metre scales are used to measure
   a. mass b. weight
   c. time d. length
3. 1 metric ton is equal to
   a. 100 quintals b. 10 quintals
   c. 1/10 quintals d. 1/100 quintals
4. Which among the following is not a device to measure mass?
   a. Spring balance b. Beam balance
   c. Physical balance d. Digital balance

II. Fill in the blanks.

1. Metre is the unit of _____
2. 1 kg of rice is weighed by _____
3. Thickness of a cricket ball is measured by _____
4. Radius of a thin wire is measured by _____
5. A physical balance measures small differences in mass up to _____

III. State whether true or false. If false, correct the statement.

1. The SI unit of electric current is kilogram.
2. Kilometre is one of the SI units of measurement.
3. In everyday life, we use the term weight instead of mass.
4. A physical balance is more sensitive than a beam balance.
5. One Celsius degree is an interval of 1K and zero degree Celsius is 273.15 K.
6. With the help of vernier caliper we can have an accuracy of 0.1 mm and with screw gauge we can have an accuracy of 0.01 mm.
