2. Honey: Dip a cotton wick in honey and light it with a match stick. Pure honey burns while adulterated honey with sugar solution gives a cracking sound.
3. Sugar: Dissolve sugar in water. If chalk powder is added as an adulterant, it will settle down.
4. Coffee powder: Sprinkle a few pinches of coffee powder in a glass of water. Coffee powder floats. If it is adulterated with tamarind powder it settles down.
5. Food grains: They have visible adulterants like marble, sand grit, stones, etc. These are removed by sorting, hand picking, washing etc.

Points to Remember

- Food is necessary for normal growth and development of living organisms.
- Prolonged deficiency of certain nutrients cause deficiency diseases leading to malnutrition.
- Drying, smoking, irradiation, refrigeration, freezing, pasteurization and canning are some of the methods of food preservation.
- Adulterants are undesirable substances added to the food against the Food Safety Standards.
- Prevention of Food Adulteration Act, 1954 laid down the minimum standards for consumer products.
