25.1.6 Insert audio and video files

You can insert audio video files to a slide to make your presentation more interesting. By default, LibreOffice provides audio and video clips that you can add to the presentation.

To insert an audio and video from the gallery, follow these steps.

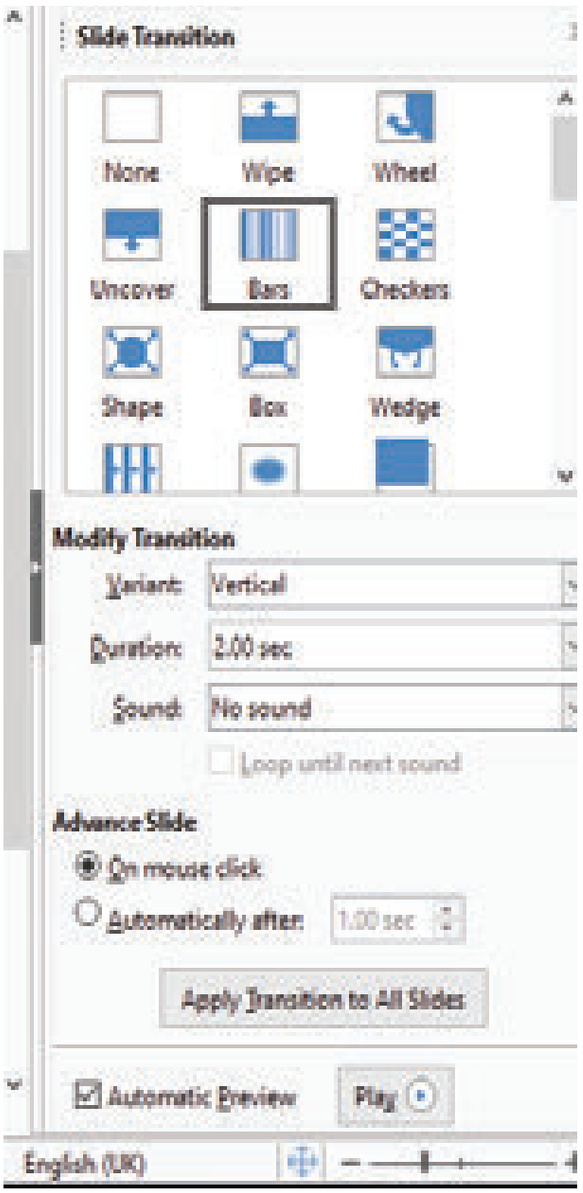

1. Open the slide
2. Click insert menu then click audio/video option. Insert audio/video dialog box appears.
3. Locate and select the audio or video file to insert in the slide.

25.1.7 Slide Transition

Slide transitions are the effects that take place when one slide gives way to the next one in the presentation, like Roll down from top or Fly in from left. They add dynamic flair to a slideshow, smoothing the transition between slides.

- Click view menu and then press slide transition option.
- Now you can select any one of the transitions (or) you can choose Slide transition option from the Sidebar setting

25.1.8 Animation

Slide animations are similar to transitions, but they are applied to individual elements in a single slide: title, chart, shape, or individual bullet point.

Select the slide and the object (text box, image) you want to apply the animation effect to. In the Sidebar, select Custom Animation icon to open the Custom Animation section. Select the animation effect types from one of the tabbed pages on the Custom Animation dialog.
