1.1 Introduction

- Now a days technological revolution modern machineries and industries show dramatic development. New techniques lead to new machines. In order to cater to the needs of our daily life, new machines are developed and places in our house, office, commercial plazas, and industry etc., Machines became a part of our life. We can see our daily life begins and ends with machines from water heater, grinder, mixer, refrigerator etc. Giant machines in the factories also fit the bill.
- In order to satisfy the rising demands of the mankind, such machines are manufactured in large number. Machinists involve themselves in the process of mass production and avert any shortfall in the demand special trainings need to be given to machinist to make them aware of modern manufacturing techniques and special skill developing abilities.
