ELECTRICITY

SLASCH

Learning Objectives

1. To know about the basic electricity and Faraday's laws and Flemming Rules.
2. To know about the direct current and alternative current.
3. To know about the motor and starter and their types.

Table Of Content

10.1 Introduction
10.2 Basics of Electricity – Voltage – Current – Resistance – Ohm's Law – Electric Circuit – Series Circuit – Parallel Circuit
10.3 Magnetism – Electro Magnetism – Magnetic flux – Electro Magnetic Induction
10.4 Faraday's Laws
10.5 Flemming Rules – Current – A.C – D.C – Difference between A.C and D.C
10.6 Electrical Equipments
10.7 Motors – Types of Motors – Difference between Squirrel cage and Slip Ring Induction Motors
10.8 Starters for Induction Motors

10.1 Introduction

Electricity is a form of energy. Benjamin Franklin discovered about the electricity. Later on Thomas Alva Edison invented the electric light bulb and world has been brighten in 1879. It is used in Electric Lamp. Electric Cooker, Refrigerator, Air conditioner and Machines etc.
