

Safety First. Duty Next.

Safety Materials used while working in workshop

himself and others working alongside him away from accidents.

SAFETY PRECAUTIONS

Safety in a workshop can be classified under four headings. They are:

1. Safety precautions regarding workshop.
2. Safety precautions regarding hand tools.
3. Safety precautions regarding machine tools.
4. Safety regarding operators.

1.7 SAFETY PRECAUTIONS REGARDING WORKSHOPS

- Round and cylindrical objects, sharp articles and tools should not be found in pathways for it may cause injuries to the workers.
- The layout of machines in the workshop should be suitably done considering proper lighting and ventilation.
- Oil and grease should not be found spilled inside workshop.
- Inflammable materials should be kept in safe places with proper precautions.
- Hot object should be kept separately, where in messages like "HOT", "DO NOT TOUCH" are displayed.
- First aid box containing proper medicine and instruments should be kept always ready in a workshop.

1.8 SAFETY PRECAUTIONS REGARDING HAND TOOLS

- Files, hammers and screw drivers with proper handles alone should be put into use.
- When hammers, chisels and punches are put into use, should be taken that any oil, grease or metal chips present on their heads are cleaned completely.
- After use measuring instruments should be kept safely in their respective covers (or) places.
- Measuring instruments should be handled properly to increase their durability.
- Sharp tools and accessories should be kept in their covers or boxes safely.
