COMPASS

Compass are used for the drawing circles and arcs of required sizes. It has two metals legs joinded at the top with help of a knee joint. One of the two legs is fitted with a adjustable needle. The other leg has an attachment which can hold an inking device (or) a pencil lead tip.

DIVIDER

Straight lines or curved lines are divided into required number of equal parts with help of dividers .(Divider is also useful in transferring dimensions from a part to another part in the drawing and set off given distances from the scale to the drawing) It is very similar in construction to a compass but for the fact that both the legs of the divider are provided with steel points.
