3 BUREAU OF INDIAN STANDARDS (BIS)

INTRODUCTION

The field of engineering and Technology is fast evolving day by day to set newer trends in the world community. The arrival of foreign technologies , technical tie –ups between different countries, and exchange of new technologies have made it mandatory to set specific international standards in the field . This need is most felt in preparing and understanding of engineering drawing . **Indian Standards Institution (ISI)** established in the year 1947, formulated the code of practice for general engineering drawing in the year 1955. ISI was taken over and renamed as **Bureau of Indian Standards(B.I.S.)**in the year 1987 by an Act in the IndianParliament.

In the year 1987 , B.I.S. has adopted the standards of **ISO (Indian Standards Organization for Standardization)**in full. The following are the topics adopted by B.I.S in the field Engineering drawing(latest version)

SI.No	Standard	Indian Status	Corresponding ISO standard
1	Drawing sheet(sizes, layout etc.)	IS: 10711-2001	ISO:5457-1999
2	General principles of presentation of Technical Drawing (Lines etc.)	IS: 10714-2001	ISO:128-1996
3	Lettering on Technical Drawing	IS: 9609-2001	ISO:3098-1997
4	Methods of Dimensioning	IS: 10718-1993	ISO:3040-1990

(**Note :** In the standards mentioned above, either the whole topic or certain parts(s) of the topic may have been withdrawn and new standards introduced)

LAY OUT OF DRAWING SHEET

The Lay out of drawing sheets make it easy for the readers to locate all important references of the drawing. For this a standard arrangement should be followed in which all the informations are included . The **Lay out of drawing** sheet should have the following features.

1. Margin
2. Title block
3. Parts list
4. Revision panel
5. Zone system
6. Folding marks
