1.11 FIRST AID

So far we have discussed about various factors to enforce safety and avoid accidents. At some times, the focus on safety may be missing due to some reason or other. In such circumstances, accidents may be happen causing liabilities to the industry as well as to the operator.

First Aid at the time of injury

Accidents may happen at any time in a workshop. The affected or injured person should be provided with immediate medical attention before he is taken to a hospital. This treatment which is given on the spot is known as first aid.

Every industry (or) a workshop should be equipped with a doctor or a first aid assistant. Apart from this, all the operators should be given proper training in first aid.

These measures will avoid heavy losses of lives. Every workshop should have a first aid box always ready with proper medicine and instruments.

1.12 MATERIALS TO BE FOUND IN A FIRST AID BOX
