

Continuous thick line

A continuous thick line in a drawing represents a visible edge or outline. It is drawn with a H or HB grade pencil.

Continuous thin line

Continuous thin lines are used for construction of a drawing. These lines are also used for drawing dimension lines, extension lines, leader lines, and sectional lines(hatching line). When used as construction lines, they do not appear on the finished drawing. But in geometrical drawings, they are removed. Continuous thin lines are drawn with 2H pencils.

Short dashes

Short dashes represent hidden features or outlines in a drawing . The dashes should be of uniform length and the spacing equal. They are drawn with H pencils.

Long chain (thin)

Long chain lines are drawn as an alternative combination of a long dash and a short dash. The lengths of both long dashes, short dashes are to be maintained uniform and they are equispaced . They represent centre lines, extreme positions movable parts and pitch circles in drawings. This types of line is drawn with a 2H pencil.

Long chain(Thick at ends)

It is very similar to a long chain line expect that the terminal long dashes are drawn thick. Cutting plane lines are represented by this type of line. The terminal dashes are drawn with H pencil and others with 2H pencils.
