2.14 Angle Plate
2.15 Tap – Types of Taps
2.16 Dies – Types Dies

3. MEASURING INSTRUMENTS AND GAUGES 33-51

3.1 Introduction
3.2 Scales
3.3 Calipers
3.4 Vernier Caliper
3.5 Micrometer
3.6 Combination Set
3.7 Sine Bar
3.8 Gauges
3.9 Difference Between Gauges and Templates

4. ENGINEERING MATERIALS 52-62

4.1 Introduction
4.2 Engineering Material
4.3 Properties of Materials—Physical Properties—Chemical Properties—Electrical Properties—Mechanical Properties
4.4 Metals
Ferrous Metals—(Pure Iron—Steel—Cast Iron)
Non Ferrous Metals—(Aluminium—Copper—Bross—Lead—Zinc)

5. HEAT TREATMENT 63-72

5.1 Introduction
5.2 Purpose of Heat Treatment
5.3 Lower and Higher Critical Temperature
5.4 Method of Heat Treatment Process — Annealing — Normalising — Hardening — Tempering — Case Hardening — Carburising — Nitriding — Cyaniding — Induction Hardening — Flame Hardening
5.5 Quenching
5.6 Heat Treatment Furances
